However, it is very important for you to know that not all of these cheats and abrupt work tools can work perfectly for unlimited Resources.If you want to use cheats or hack tools when playing a game, you need to make sure that hack tools or cheats come from a reliable source. You also need to know how to get these cheats and sharp work tools as well. More importantly, you need to know how to use these cheats and sharp work tools correctly. Learn more about Tap Tycoon gameplay Tap Tycoon consist of a little hard gameplay. At the beginning of the game, players must Choose a story among different types of stories that are present in the game. The game includes all kinds of stories such as romance, stories, drama, horror and more. After selecting the story, you need to create a their choice. Consumers should give a good look at their character. One needs to unlock more and more stories or they can also get more stories from Choice hack. By hacking the game, one can watch more stories. It helps them in many ways by hacking users of the game get a sufficient amount of resources.Meaning of currency in Tap TycoonThere are two major currencies in the game that are resources. It takes a long time, which is nearly 3 hours to create currencies in the form of resources. Keys are helped in unlocking different types of stories and chapters. Resources are used to purchase more modern and classic costumes for your character. It is essential that gamers earn a good amount of currency. The best way to earn currency is by completing more stories and chapters. Some other easy ways to earn currency in are given below -Facebook connection - Resources are earned by entering the game, or you can say that by linking the game to Facebook.Register and create a new account – This means that users need to create a new account or register in the game. It helps them earn currency in the game. Invite friends via Facebook — To earn a good amount of currency, you need to invite your friends using Facebook.In a nutshell, it is essential for gamers to know and understand correctly all of the above information and ways. Another easy way to earn resources is from tap tycoon hack. I hope you can understand all the information mentioned above. This will be a guide for new tycoon players to give you a jump in the game and hopefully help you with the basics of the game. In addition, the General Tips section will teach you useful tips to help you progress faster. This guide will answer questions like Where are my statistics? Where do I spend my diamonds? Which tech maps are worth the most? How do I catch up with older players? When will it be my prestige? and many others. As such, this publication will consist of the following headers. Game Interface Prestiging General Tips for those looking for more advanced transformation guide and worlds, stay to the tune because we will post about it soon after we get enough information: D Also, in the Preselect section provides a preliminary calculator: D Game interface first shutdown, game interface. When you open the game for the first time, you'll be greeted with a screen that wants your name. Then you're left with a screen with a few buttons that have no explanation or anything (until you accidentally click on the screen and earn \$20). Then there will be a glove pointing to the tab in the lower left corner, and after clicking on it, you will be asked to click the upgrade button. - What do I mean? In my opinion, it's not very comprehensive. Here we will explain where to find Things. Settings settings is in the upper left corner of the screen, in the form of a gear. There's a lot you can do here, and one thing. One, which will help you earn diamonds. First of all, the sound (eavesdropping and all), music (background music only), language, notification and rocket boy and fat cat can also be switched here. These features can help save battery and possibly save your data for money. Because you won't have to load ads. Secondly, the help feature is also available here. This will teach you a little more about the rest of the game. Finally, the account tab, if you have not already created an account, do it now, you can earn up to 100 diamonds, and also, in case you need to change phones, your progress will be saved and transferable. Investment Group Investment Group is at the top right of the screen, in a building. This button allows you to join an investment group, fellow players to form a group and help each other. In addition, investment groups provide bonuses and also have a function of rumors that help predict the best investment of the day. Player The player tab is the red field at the bottom of the screen with a human face. This section allows you to upgrade your touch of profit and unlock the unlockable. In addition, you can change the player's name by clicking on the Small Account tab. You can also check your statistics in the statistics section, this allows you to keep track of your bonuses, as well as how much your maximum net worth is, etc. This section has only one function to modernize companies. You can also click on each individual business to show when and what the next bonus is. Technology maps The technology maps section is green with a bulb icon. This section has two features, checking what you have technology cards and what doesn't, and buying tech cards from a card store. For a complete list of technical card, please see our technical card list technical map. Also, recommendations for technology maps will be given below, in the general section for tips. Tip forex tab is in orange with a pile of cash icon. This section, of course, as its name suggests, allows you to use a tip for the price of diamonds (not worth it in my opinion, they do not give a lasting bonus). The tip is, raising 24 hours of money, restoring coolers of skill, doubling your profit in 24 hours, and the rest are offers to buy diamonds. \* Based on my disposable 24-hour winnings, the bonus disappears after pre-completion. Prestiging Prestiging, one of the most important components of the game to bring you further. But the important questions are, when does prestige make you? Is there any chance you'll ruin your prestige? Is it worth using 200 diamonds for prestige? When will I receive technology maps and prepare before technical card when I receive my next technical card? We'll answer those questions here. Bonus prestige is the main main On prestiging, it gives you a bonus to return to your former glory at a faster speed, with more ease. When are you going to be prestige? There are two situations when you have prestige. Situation 1 is when your progress slows down to a diligent phase, that is, when you only earn millions, but all your improvements are in trillions or even AAs. Situation 2 is if you are able to return to your former glory in a 30-minute period of time or after using the entire skill set once. When you are able to do so, continue to do so until you are able to have a profit that allows you to reach the next set of improvements with ease. Essentially, SHORT runs are a way to go when you get stuck and, as a general rule, don't force your way to the next set of improvements, waiting all week just to get the amount, just prestige when you're stuck. Do not use 200 diamonds to restart, diamonds are valuable limited resources that need to be used to get lasting permanent bonuses such as technology cards and should not be used to screw up your tracks. If you're only looking for a prestige bonus, the only way to screw up is by going too far and taking too little prestige bonus. The Army sent Spartan Caliber from Reddit to our knowledge that there were mistakes in our post before that. It seems that the 126% rule no longer applies and the army won is based on your level, as such, there is no need for the calculator. Moreover, this would mean that long runs would be useless and suppression with short runs would be most useful because it allows you to build a prestige bonus without putting a dent in your sent group. This means that active players will have the opportunity to progress quickly. The army sent is a secondary function of incitement. When you're prestige, you get a certain number of soldiers. For those of you who are more nerdy and want to know when your soldier is increasing, he is every 1.26 times your previous prestigious value and for each soldier afterwards. This means that 1 soldier will be given at 1.26 x PP (previous prestige), 2 soldiers at 1.26^2 x PP, 3 soldiers of 1.26^3 x PP. What all this bunch of nonsense means that, you can screw run badly if you prestige in 1.25 x PP, because it means you will not get every soldier and at the same time, increase your PP. Therefore my personal opinion would be to prestige in close to your PP, if you do short runs, and if you do long runs, try to speak out as soon as you get a new group. Here's a prestigious calculator to help you plan your runs and decide whether to prestige, just download the file from Excel by clicking on this link - &gt; Prestige calculator. (Make forgiveness work is in Excel and if you all have any questions / feedback, feel free to share your entrance in the comments section) Tech Cards Tech cards are given to different Points of your games when prestige of a certain amount of value. This list can be which is in the setup buton. Essentially, you have no control over that part of the slip and the only time when that's a question is if you're about to get a technical card, you just have to press on it. Furthermore, I would suggest that we ignore this section of incitement. General advice always use all your skills together. Use fast cash after business supercharged, and auto tap, cash and cede touch. That's because you stack skills together. When tapping, always place your phone on a flat surface and use as many fingers as you feel comfortable with. The average number of cranes will be about 600 hammers in 30 seconds. Currently, there is only one way to check the number of cranes by doing the challenge of your investment groups on a daily basis. Therefore, I encourage you to contribute to your groups and check your input speed. (GUYS share the largest number of taps within 30 seconds below: D would be good if you upload a photo as proof and see who is the best) Always use fat cat, worth it. If you can, use level 1 skills once before upgrading it, because by the time you finish upgrading your business and make a slight boost, 15 minutes will have passed and you'll be able to use your skills again. Link your account to Facebook to get 100 gems. Just do it. Join an investment group so that you always get the right investment in the daily investment. Create an investment group if you have to, because you'll recover the diamonds quickly, instead of getting a miserable 1 diamond when you get the wrong one. Watch 5 diamonds ad, it doesn't come all the time, so take a chance when you can @ short runs when you're stuck. Play mainly on eavesdropping if you want to progress faster, however, save yourself time by playing only when your skills are finished cooling off. Please do not spend time when you can achieve a similar result by spending 30 seconds. With the new change, active players are rewarded more because you don't have to be interested in losing troops to perform short runs. Try to collect all the technology maps first. This is extremely important because what people do not realize is that a normal card gives x2 to level 1 for the price of a 1/5 gold card. Take, for example, barber's gold technical card, it's only the equivalent of 3 normal tech maps. In short, collecting all the technology maps first is the best choice. Soon we will publish a publication of the various technology maps. We hope these tips will help you all: D and offer some games for us to write, or what to write on the suggestions page. Page.
